

Toshiba Satellite M45 Keyboard Replacement

Written By: Aryn Pauly

INTRODUCTION

This guide will show you how to replace your keyboard.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Keyboard

- Carefully pry off the panel above the keyboard from the both sides of the laptop using a flat edge tool.
- Push back the screen until it is horizontal with the laptop.
- Gently remove the clips that hold the panel onto the screen hinges.

Step 2

- Remove the two screws on the upper outer edges of the keyboard with a #1 Phillips head screwdriver.
- Gently pry the keyboard from the laptop on the upper outer edges using the flat edge tool.
- Slowly lift the keyboard away from the laptop until you are able to remove the ribbon that connects the keyboard to the laptop.

⚠ CAUTION!! Make sure you remove the keyboard slowly to avoid damaging the ribbon cable.

To reassemble your device, follow these instructions in reverse order.
